## **CLE Lower Roadway Construction Project is complete and open**

**What:** Lower roadway construction project

**Where:** Cleveland Hopkins International Airport (CLE)  
5300 Riverside Drive

**When:** Wednesday, Nov. 24, 2009

Just in time for the Thanksgiving Day holiday rush, the lower roadway construction project at Cleveland Hopkins International Airport is complete and now open. The lower roadway was closed in October for the full rehabilitation of the middle section of the lower roadway and to perform work on the inner two travel lanes.

Until further notice, all airport shuttle services, including the rental car shuttles and off-site parking shuttles will pick up passengers in the limousine lot adjacent to the main parking garage. Passengers leaving the terminal will be directed to the lower level for shuttle pick up.

“Thanks to the contractors and airport staff who worked so hard to complete this project prior to the Thanksgiving Day holiday travel season,” said Airport Director Ricky Smith.
